Name of Research Article

**Introduction** 1 paragraph. Briefly summarize the authors’ reasons for writing the journal article.

**Do not** list all the author names as a way of padding your word count. For example, instead of "In this paper by Block, Shestowsky, Segovia, Goodman, Schaaf, and Alexander" you should write "In this paper by Goodman...."because Dr. Goodman is the faculty member from UC Davis (the faculty member’s name will be bolded in the article list).

**Method** 1-3 paragraphs. Briefly describe study methods.

**Results and Conclusions** 1-2 paragraphs: Briefly summarize study results and author conclusions

**Reactions** 3-5 FULL paragraphs This is, by far, the most important part of your paper. Be sure to write enough to avoid needing revisions, and to follow the instructions for the prompt carefully. Do not re-summarize the results. Write your reactions, things you discovered or find interesting, how what you read relates to your PSC1 or 41 class.

**Reference**
Include the entire reference for the paper you read here. It should be APA style, and you can copy & paste it from the list of research papers online. You should NOT copy all the references that are listed in the article you read. You ONLY need to include the reference for the 1 paper you are summarizing.

Example:
